1. Introduction

The Department of Census and Statistics (DCS) has released the National Consumer Price Index (NCPI) and Inflation rate for the month of April 2020.

The NCPI has been released monthly from October 2015 with a time lag of 21 days. The NCPI has weights based on consumer spending in 2012/13 Household Income and Expenditure Survey (HIES), and reflects new methods consistent with international best practices. Also the DCS has rebased the Colombo Consumer Price Index (CCPI) with the base period of 2013 from January 2017, covering the urban areas of Colombo district.

To reflect international recommendations and best practices, the index weights refer to each item's share in the total consumption expenditures of all Sri Lankan households. The provincial weights refer to the consumption expenditures within the province in proportion to the expenditures in the whole country. The index weights are based on expenditure data derived from the Household Income and Expenditure Survey (HIES) conducted in 2012/13. The 2012/13 HIES included all types of consumption expenditures by households, and was broadly representative of all households in the country. The year 2013 is considered as the base year for NCPI.

The national consumer basket includes 407 items which represent the consumption expenditure of all households in Sri Lanka. For the compilation of NCPI, three price quotations are collected for each of the items in every district town. Prices for some items are collected weekly (e.g. fresh fish, rice, vegetables, fruits, coconut etc.), while prices for other items are collected once every two weeks (e.g. leafy vegetables, dried fish, spices, etc.), monthly (e.g. Textile, Footwear, Non-durable household goods etc.) or quarterly (e.g. Consumer durables (furniture), Building materials, Pharmaceutical items etc.). The frequency of price collection is determined by on an average how frequently price changes take place.

2. Month on Month (M on M) change of NCPI:

The NCPI for all items for the month of April 2020 was 134.8. A decrease of 0.4 index points or 0.3 percentage compared to March 2020 for which the index was 135.2. This decrease represents decrease in expenditure value of Rs. 142.73 in the "Market Basket".

Monthly changes of index numbers, expenditure values and percentage change of index numbers are given in the following table (Table 01).

Table 01: Monthly Changes by Main Groups of Market Basket

Main Group*	Index Number			Monthly Changes of the Expenditure Value (Rs.)			Monthly changes of the index (%)		
	Apr 2019	Mar 2020	Apr 2020	Apr 2019	Mar 2019	Apr 2020	Apr 2019	Mar 2019	Apr 2020
All Items	127.3	135.2	134.8	300.33	-579.37	-142.73	0.74	-1.32	-0.33
Food and Non Alcoholic Beverages	122.5	138.5	137.5	156.82	-619.85	-142.73	0.39	-1.41	-0.33
Non Food	131.1	132.6	132.6	143.51	40.49	0.00	0.35	0.09	0.00

*Note 1: There are 12 main groups of the market basket. Monthly significant changes were noted only in Food and Non Alcoholic Beverages group in April 2020, details on which are given in Table 02.

Note 2: Non Food: Groups of 'Alcoholic beverages, Tobacco and Narcotics', 'Clothing and Footwear', 'Housing, Water, Electricity, Gas and Other fuels', 'Furnishing, Household Equipment and Routine Household Maintenance', 'Health', 'Transport', 'Communication', 'Recreation and Culture', 'Education', 'Restaurants and Hotels' and 'Miscellaneous Goods and Services' are considered as the 'Non Food'.

Contribution to Month-on-Month Changes:

Contributions to the decrease in NCPI on Month-on-Month basis (April 2020 as compared to March 2020) are given in Table 02. The decrease in the index point by 0.33% was due to the totally decrease of index value of food items by 0.33%. The group of non-food items remained unchanged during the month of April 2020.

2.1.1. Contribution of Food items: -0.33%

As shown in Table 02, the decreases in index values were reported for Vegetables (0.73%), Fresh fruits (0.15%), Big onions (0.15%), Eggs (0.12%), Green chilies (0.06%), Rice (0.04%), Chicken (0.03%), Fresh fish (0.03%), Canned fish (0.02%) and Garlic (0.01%). However, increases in index values were reported for Coconuts (0.19%), Limes (0.15%), Sugar (0.11%), Dried fish (0.10%), Chili powder (0.09%), Coconut oil (0.07%), Potatoes (0.06%), Curry powder (0.04%), Milk powder (0.04%), Dried chilies (0.03%), Turmeric powder (0.03%), Gram (0.02%), Pepper (0.02%), Mysore dhal (0.02%) and Coriander (0.01%).

2.1.2. Contribution of Non-food items: 0.00%

All eleven non food groups remained unchanged during the month of April 2020 was due to the priority of providing essential services during COVID-19 pandemic situation of the country. Even though, provision of essential services included in the non food groups of items 'Health', 'Transport' and 'Housing, Water Electricity, Gas and Other Fuel' those groups also remained unchanged during the month of April 2020.

3. Inflation

The NCPI is a macroeconomic indicator compiled to measure inflation which is defined as a sustained increase in the general level of prices for goods and services and it is measured as an annual percentage increase by NCPI. Inflation can be measured in two ways. One measure is the Year-on-Year base or Point-to-Point inflation (The percentage change in the current month CPI over same month CPI of last year). The other measure is Moving Average Inflation (The percentage difference between the average Price Indices of last 12 months & the average Price Indices of previous 12 months).

3.1. Year-on-Year Inflation

The overall rate of inflation as measured by NCPI on Year-on-Year basis is 5.9% in April 2020 and inflation calculated for March 2020 was 7.0% (Table 03). Year-on-Year inflation of food group has decreased from 14.1% in March 2020 to 12.2% in April 2020 and that of non-food group has also decreased from 1.8% to 1.1% during this month.

Contribution to Year-on-Year inflation:

On Year-on-Year basis, contribution of food commodities to inflation was 5.18 percent in April 2020 compared to that of April 2019 (Table 04).

Contribution of non-food items was 0.68 percent. This was mainly due to price increases in groups of 'Housing, Water, Electricity, Gas and Other fuels' (0.16%), 'Transport' (0.16%), 'Education' (0.15%), 'Alcoholic beverages, Tobacco and Narcotics' (0.11%), 'Clothing and Footwear' (0.09%), 'Restaurant and Hotels' (0.05%), 'Health' (0.05%), 'Recreation and Culture' (0.04%), 'Miscellaneous Goods and Services' (0.04%) and 'Furnishing, Household equipment and Routine household maintenance' (0.04%). However, decrease in prices were reported for group of 'Communication' (0.23%).

3.2. Moving Average Inflation

The moving average inflation for the month of April 2020 is 5.1%. The corresponding rate for the month of March 2020 was 4.9%.

Information Note on Implications of COVID-19 on the National Consumer Price Index (NCPI)

To keep the higher accuracy of the Consumer Price Index, the majority of price data are collected by personal visits by the DCS price collecting officers. This personal visit type of data collection has suspended during the month of April, 2020 due to this pandemic situation of the country.

In particular, the collection of prices has become increasingly difficult. Issues and challenges include increased numbers of missing items in sampled outlets, the temporary closure of retail outlets and restrictions on movement.

When facing numbers of missing prices, it is important to mentioned that all temporarily missing prices were imputed using the methods described in Consumer Price Index Manual.

To continue the monthly series of NCPI during COVID-19 pandemic situation of the country, the food price imputations for the month of April 2020 were based on the prices of the essential food items in the market basket obtained from the district retail price collecting officers in their districts during the period and considered other available food price data sources during the month of April 2020.
